Skills and Qualifications

Languages: Python, SQL (MySQL), HTML, CSS, JavaScript, TypeScript, Bash, Java, C++

Frameworks and Tools: Git, Linux, Amazon Web Services (AWS), Django, Flask, REST, Apache, Grafana, Highcharts, Bootstrap, Gridstack, Elasticsearch, RabbitMQ, Selenium, FFmpeg, Postman, Memcached, Jira, ChatGPT Codex

Work Experience

Data Engineer Contractor, Anuvu - Chicago, IL

Mar. 2025 – Present

Senior Data Engineer, Anuvu - Chicago, IL

Apr. 2018 – Mar. 2023

- Developed and optimized Python, SQL, and Bash ETL pipelines processing approximately 1 TB per day of airline connectivity data using MySQL, AWS, and Grafana
- Built a daemonized Python ingestion system that transferred high-volume data from Amazon S3 into production databases, reducing ingestion time by up to 90%
- Optimized a Django-based aircraft monitoring platform used to analyze real-time and historical data, reducing some page-load times by up to 50%
- Refactored the front and back ends of a modular dashboard platform, reducing code volume by more than 70% while improving usability and reporting functionality
- Built a Python-based data collection pipeline to gather Twitter data related to in-flight Wi-Fi performance; prepared text data for analysis via an LSTM sentiment model
- Designed and maintained a Flask REST API and supporting data models to ingest and validate media metadata across multiple airline fleets
- Improved performance of various legacy log parsers by up to 50%
- Developed a Selenium testing harness for a production reporting platform
- Supervised and mentored entry-level engineers and interns

Software Engineer, Lyrical Labs, LLC - Chicago, IL

Mar. 2015 – Dec. 2017

- Developed Java backend for H.264/H.265 video encoding system
- Built and deployed REST API for cloud video encoding job submission
- Spearheaded design of a video quality testing harness using Python and VMAF

SQL Developer, University of Iowa Energy Control Center

May. 2013 – Jan. 2015

- Developed SQL queries and views relating to campus-wide energy use
- Built various VBA scripts to sanitize and parse Excel energy reports

Junior GPS Technician, University of Iowa Facilities Management

Oct. 2011 – Jun. 2013

- Working with University construction projects, creating and improving electronically maintained AutoCAD and ArcGIS Maps for underground utilities

Education

Bachelor of Science in Electrical Engineering, University of Iowa

Aug. 2010 - Dec. 2014

Computer Engineering Track, Minor in Mathematics, Specialization in Sustainability
